## TESTIMONIALS.

---

These are to certify that, on occasion of his being admitted by this University to the Degrees of Bachelor of Medicine and Master in Surgery, ROBERT JOHN GARDEN was found entitled to the Highest Academical Honours.

(Signed) P. C. CAMPBELL, D.D.,  
Principal and Vice-Chancellor.

(Signed) WILLIAM PIRRIE, C.M.,  
Promoter to the Degree of M.C.

(Signed) J. MACROBIN, M.D.,  
Dean of the Medical Faculty,  
Promoter to the Degree of M.B.

Given at the University, Aberdeen, the 23rd day of  
April, 1872.

(Signed) JAS. S. BRAZIER,  
Professor of Chemistry, and Secretary to  
the Faculty of Medicine.

*From JOHN STRUTHERS, Esq., M.D., F.R.S.E., Professor of Anatomy, University of Aberdeen.*

22nd May, 1872.

Dr. ROBERT JOHN GARDEN has been well known to me since the commencement of his medical studies. He has all along been one of the most exemplary and distinguished students in the School. In Anatomy he was one of the highest prizemen and one of the prosectors for the class. He has filled the position of House-Surgeon to the Royal Infirmary, and has now graduated in Medicine and Surgery with "Highest Honours."

To the above I have much pleasure in adding an expression of my high personal esteem for Dr. GARDEN.

JOHN STRUTHERS.

---

*From WILLIAM PIRRIE, Esq., C.M., M.D., F.R.S.E., Professor of Surgery, University of Aberdeen.*

29th May, 1872.

It gives me great pleasure to certify that Dr. GARDEN was a very distinguished Student of Medicine at this University during the whole of the period of his under-graduate study,—that he greatly distinguished himself in the Class of Surgery,—that he was my Class Assistant for one Session, and Surgeons' Assistant at the Hospital, and performed the duties of both offices in a very creditable manner,—that I had frequent opportunities of forming a just appreciation of Dr. GARDEN, and that I consider him as well qualified as any one of the same standing to practise his profession.

WILLIAM PIRRIE.

17th February, 1874.

Having already certified my high appreciation of the talents and attainments of Dr. GARDEN, before he left Aberdeen to study the various branches of Medical science at several of the most celebrated Medical Schools on the Continent, it is only

necessary for me to add that I consider him admirably qualified to perform the duties of Medical Officer to the Old Machar Poor-house.

WILLIAM PIRRIE.

---

*From JOHN MACROBIN, Esq., M.D., Professor of Medicine, and Dean of the Faculty of Medicine, University of Aberdeen.*

17th May, 1872.

I have much pleasure in expressing the high opinion which I entertain of the qualifications of ROBERT JOHN GARDEN, who is a distinguished Graduate of this University—having obtained his Degrees in Medicine and Surgery with the Highest Honours. He has not only received an extensive medical education, but also a superior classical and philosophical training at the University. I can say with the greatest confidence that Dr. GARDEN is in every respect admirably fitted to discharge the duties of his profession in whatever sphere of practice he may be placed—public or private—and that he will perform them with fidelity and zeal.

J. MACROBIN, M.D.

---

*From A. HARVEY, Esq., Professor of Materia Medica in the University of Aberdeen, and Consulting Physician to the Aberdeen Royal Infirmary.*

UNIVERSITY OF ABERDEEN,  
14th February, 1874.

I have peculiar satisfaction in giving expression to the high opinion I entertain of the professional acquirements and the personal character of Dr. ROBERT JOHN GARDEN.

As a Student of this Medical School, Dr. GARDEN was one of the foremost Students of his time—distinguished by his intelligence, devotion to work, and the excellence of his attainments.

On occasion, moreover, of taking his Degrees of M.B. and

C.M., in 1872, Dr. GARDEN graduated with “*Highest Academical Honours.*” This distinction is one that is attained by an exceedingly small number of our graduates, and of itself implies a very high order of merit. And, indeed, of one thus distinguished, it were almost superfluous to say anything in the way of commendation. The official attestation of the distinction in question, by the University Authorities, is the strongest Testimonial for any purpose that one can present in his own behalf. Nevertheless, I gladly add an expression of my own sense of Dr. GARDEN’S fitness to have those Honours conferred upon him. No one, in my opinion, could well have been more deserving of them.

Since taking his Degrees, Dr. GARDEN has resided nearly two years on the Continent—in Germany and France—prosecuting his studies, more particularly at the celebrated Schools of Berlin, Vienna, and Würzburg, much to his advantage every way.

As bearing on Dr. GARDEN’S practical training, it requires to be noted that during the course of his University studies he was appointed to the responsible office of Resident Surgeon’s Assistant in the Royal Infirmary here. That office he held for Twelve months, giving (I have reason to know) entire satisfaction to the Medical Officers, and availing himself to the utmost of the opportunities thus afforded him of acquiring a practical knowledge of his profession.

Dr. GARDEN’S personal character is in keeping with his professional—excellent.

Altogether, I consider Dr. GARDEN one of the most promising of our young medical men.

ALEX. HARVEY, M.D.

Professor of Materia Medica in the University of Aberdeen,  
and Consulting Physician to the Royal Infirmary.

---

From DAVID KERR, Esq., M.D., &c., Surgeon to the Royal Infirmary, and  
Lecturer on Clinical Surgery.

Having been requested to state my opinion of the character and professional acquirements of Mr. ROBERT J. GARDEN, a Gra-

duate in Medicine and Surgery of the University of Aberdeen, I have much pleasure in being able to state that I have known Mr. GARDEN intimately for several years. During the bygone year Mr. GARDEN acted as Resident Surgeon in the Royal Infirmary of Aberdeen, and I was thus brought into daily intercourse with him, and I was highly pleased with the care and diligence with which he watched over the best interests of the patients, and the skilful treatment he brought to bear on the management of the cases; and when I say that he graduated with the *Highest Honours* in *Medicine* and *Surgery*, that he is a young man of good character and sound principle, I need add nothing more to recommend him.

DAVID KERR, M.D.,  
Surgeon, Royal Infirmary.

ABERDEEN, 31st May, 1872.

---

*From* DAVID FIDDES, Esq., M.D., &c., *Surgeon to the Royal Infirmary, and Examiner in Medicine in the University of Aberdeen, &c., &c.*

154, UNION STREET,  
ABERDEEN, 15th May, 1872.

DEAR SIR,

I have much pleasure in complying with your request in giving you a Certificate of your ability and fitness to practise your profession.

I know you to be a gentleman of good abilities, and of your having received not only a good classical education at this University, but also a good professional one at it.

When you were a pupil at the Royal Infirmary, you were looked upon as a hard working and diligent student, as you never missed an opportunity of gaining a practical knowledge of your profession, by studying the cases and accidents that were brought into it.

During the time you were House Surgeon, I had many opportunities of judging of your professional attainments, and I have no hesitation in certifying that they are of a high order; and I am sure, from the appearance you made at the examina-

tions for your degrees—which you received with the Highest Academical Honours—that you are well acquainted with the nature and treatment of Medical and Surgical cases, and with Midwifery and the Diseases of Women and Children.

You were much respected by those you had the charge of, as you were always kind, attentive, and upright and gentlemanly in your behaviour to them.

Wishing you great success in your profession,

I am,

Yours very sincerely,

DAVID FIDDES, M.D.,

Surgeon to the Royal Infirmary, and  
Examiner in Medicine to the University of Aberdeen,  
&c., &c.

*From J. W. F. SMITH-SHAND, Esq., M.D., Physician to the Royal Infirmary ;  
Lecturer on Clinical Medicine.*

256, UNION STREET,

20th February, 1874.

It gives me great pleasure to express the high opinion I have formed of Dr. GARDEN'S fitness for the practice of his profession.

He was a most diligent and successful Student here during his University and Hospital career; and he has since then extended his opportunities of observing disease and acquiring medical knowledge and experience by attending the chief Continental Schools.

From my acquaintance with Dr. GARDEN'S excellent professional attainments, kindly manner, and general character, I can, with the greatest confidence, recommend him for the charge of any public Hospital or Parochial Appointment, feeling sure that he will discharge the duties required of him with credit to himself and to the satisfaction of the Managers.

J. W. F. SMITH-SHAND, M.D.

*From* ANGUS FRASER. *Esq.*, M.D., *Physician to the Royal Infirmary, and Lecturer on Clinical Medicine.*

I have much pleasure in bearing my testimony to the high professional acquirements of Dr. ROBERT J. GARDEN. As a Student, he has borne a very high character all through his medical studies; and at the end of his curriculum, he received his degrees with Highest Honours. He has also, during the past twelve months, held the responsible office of House Surgeon to the Aberdeen Infirmary, and from the manner in which he has, I have reason to know, discharged the duties there falling to him, as well as from his general intelligence and thorough acquaintance with the practical duties of his profession, I believe that he is eminently qualified for filling any situation for which he may become a candidate.

ANGUS FRASER, M.D.,

Physician to the Aberdeen Royal Infirmary, &c.

193, UNION STREET,

ABERDEEN, 13th May, 1872.

*From* ROBERT RATTRAY, *Esq.*, M.D., M.R.C.S., *Eng.*, *Superintendent, Royal Infirmary, Aberdeen.*

ROYAL INFIRMARY,

ABERDEEN, 30th May, 1872.

Dr. ROBERT J. GARDEN has been known to me for a considerable part of the time he has been engaged as a Student of Medicine, especially during the latter part, when he occupied the place of Resident Assistant to the Surgeons of this Hospital.

Dr. GARDEN was well prepared for entering on a course of professional study, having received a complete preliminary education at the Schools and University of this place; and throughout the course of his Medical education, he has been distinguished as a Student of the first order, and has taken Honorary Certificates in several of the branches of Medical Science, which constitute the curriculum of the University.

During the period he was a resident official here, I had ample opportunities of observing his diligence as a Student, and the

care and ability with which he discharged the duties entrusted to him, as well as the deep interest he took in the general comfort and welfare of the patients under his charge. I have, therefore, reason to believe that, from his professional acquirements, his general information, and his worth and kindly disposition, Dr. GARDEN is well qualified to practise his profession in any situation in which he may be placed with credit to himself and advantage to those who employ him.

ROBERT RATTRAY,

M.D., M.R.C.S., Eng.,  
Superintendent, Royal Infirmary.

---

From ALEX. DYCE DAVIDSON, Esq., M.D., M.R.C.S., &c., *Ophthalmic Surgeon*  
to the *Royal Infirmary, &c.*

224, UNION STREET,

ABERDEEN, 6th September, 1873.

I have very great pleasure in being able to testify to the high professional qualifications of Dr. R. J. GARDEN, whom I have known intimately for many years. Having passed through the Curriculum of Arts, Dr. GARDEN entered on his Medical studies, and in all his Classes he distinguished himself by his industry and intelligence. Out of several Candidates he was selected to fill the responsible office of House Surgeon in the Royal Infirmary, where he performed all his duties to the satisfaction of all connected with the Institution. After having graduated with the *Highest Academical Honours*, he pursued his studies at several of the most renowned German Universities, where, I know, he freely availed himself of the many valuable opportunities there afforded him of still further advancing his professional knowledge.

The information he has thus acquired, and the zeal he has always shown in his various studies, must necessarily make him a very valuable acquisition for the staff of any public Institution, and its Directors would be well to secure the services of such an energetic and well-qualified Medical Officer.

ALEX. DYCE DAVIDSON, M.D.

*From* ALEX. OGSTON, *Esq.*, M.D., *Junior Surgeon to the Royal Infirmary,*  
*Examiner in Medicine in the University of Aberdeen, &c.*

252, UNION STREET,  
 17th February, 1874.

I have pleasure in stating that Dr. ROBERT J. GARDEN was a very successful and distinguished Student at the University, and filled, with satisfaction to the staff, the office of House Surgeon to the Aberdeen Royal Infirmary. He devoted himself with great earnestness to the less usual branches of Medical study; and since obtaining his degree, he has been completing his knowledge in these respects in the Medical Schools of Berlin and Vienna.

I believe Dr. GARDEN will take a high position in the Medical profession.

ALEX. OGSTON.

*From* GEORGE DICKIE, *Esq.*, M.D., &c., *Professor of Botany in the University of*  
*Aberdeen.*

ABERDEEN, 25th February, 1874.

Dr. R. J. GARDEN has been known to me for several years. He was one of the most industrious and exemplary Students at our Medical School. It may be sufficient to state that he received his degree with Highest Honours.

He has been nearly two years on the Continent studying at the well-known Medical Schools of Berlin, Vienna, and Würzburg, and diligently acquiring a practical knowledge of his profession.

I believe he would efficiently and conscientiously discharge the duties of the office for which he is a candidate.

G. DICKIE, M.D., &c.,  
 Professor of Botany.

*From JAMES RODGER, Esq., M.B., C.M., Lecturer on Pathology in the Royal Infirmary, Aberdeen.*

I have very great pleasure in recording the high opinion I entertain of the character and professional abilities of Dr. ROBERT JOHN GARDEN.

I have known Dr. GARDEN from the time when he first commenced his studies at the University in Aberdeen, and I can testify to the attention and diligence with which he devoted himself to his Anatomical studies, of which I had then the superintendence and direction while acting as Demonstrator of Anatomy. In the practical work of the Dissecting-room he proved a careful and neat Dissector, and obtained a thorough practical knowledge of Anatomy, for which he was appointed, when a senior Student, to act as one of the Prosectors for the Anatomy Class.

Dr. GARDEN also attended my Class for Morbid Anatomy for six months during the Winter Session 1871-72, where he acquired a good knowledge of the anatomical characters of morbid affections of the tissues of the body, and was engaged in preparing and examining, with the microscope, their histological characters.

After taking his Degree with Highest Honours, DR. GARDEN, for the last two years, has enjoyed the additional advantage of prosecuting further his studies in the higher and more special departments of Medicine, directly under the superintendence of the great masters and authorities in modern scientific Medicine at several of the most renowned Universities of Germany; he has attained a good knowledge of the German language and German medical literature, and has industriously availed himself of the opportunities afforded him, of studying the numerous and varied forms of disease occurring in the large continental hospitals, thus largely adding to his knowledge and experience.

As a Student, Dr. GARDEN was always steady and industriously devoted to his work, in which he showed remarkable ability and appreciation, but most especially a ready aptitude for all its practical departments. He was notable for his exact and punctual habits, and his sterling, upright, and independent character earned for him the esteem of all his teachers and fellow-students.

I further consider that Dr. GARDEN has now obtained a first-class Medical and scientific education, highly qualifying him for the general practice of his profession, and it is with more than ordinary confidence that I would recommend him for the discharge of any public office his qualifications may entitle him to hold; that he would discharge the duties incumbent on him with diligence and efficiency, and I anticipate for him a successful and prosperous professional career.

JAMES RODGER, M.B.

KING STREET,  
ABERDEEN, 26th February, 1874.

---

*Von Herrn Dr. EDUARD MARTIN, Prof. der Gynæcologie und Geburtshülfe an der Universität zu Berlin.*

ZEUGNISS.

Herr Dr. R. J. GARDEN aus Aberdeen, Scotland, hat während des Winters 1872-73 die von mir geleitete gynæcologisch-geburtshülflche Klinik der Universität zu Berlin mit rühmlichen Eifer und Fleiss besucht.

DR. EDUARD MARTIN,  
Geheimer Medicinalrath und Professor der  
Gynæcologie und Geburtshülfe.

[TRANSLATION].

*From Dr. EDWARD MARTIN, Professor of Gymnæcology and Midwifery at the University of Berlin.*

Dr. R. J. GARDEN from Aberdeen, in Scotland, has attended with commendable zeal and diligence the Gynæcological and Midwifery Clinique of the University of Berlin, which is conducted by me.

DR. EDUARD MARTIN,  
Professor of Gynæcology and Midwifery.

*From Dr. A. MARTIN, Assistant Physician to the Royal University, Maternity, and Gynæcological Clinique of Berlin.*

Dr. R. J. GARDEN has attended the Gynæcological Clinique of the Royal University of Berlin during the Winter Session of 1872-1873. I am very glad to say that he has been one of the most indefatigable and intelligent visitors as well of the Ambulance as of the Clinical Wards. It will give me great satisfaction to hear him rewarded by the acknowledgement of his countrymen, of which he is thoroughly deserving.

DR. A. MARTIN,

Assistant Physician to the Royal University, Maternity, and Gynæcological Clinique of Berlin.

BERLIN, Feb. 27, 1874.

*Von Dr. FRAENTZEL, Docent an der Universität und Dirig. Ärzte an der Charité, Berlin.*

BERLIN, den 4ten April, 1873.

Herr Dr. ROBERT JOHN GARDEN aus Aberdeen, hat im verflossenen Wintersemester meine Vorlesungen über Auskultation und Percussion welches ich demselben hiemit gern bescheinige.

DR. FRAENTZEL,

Docent an der Universität und Dirig. Arzt  
an der Charité, Berlin.

[TRANSLATION].

*From Dr. FRAENTZEL, Tutor at the University and Medical Director in the Charité at Berlin.*

BERLIN, the 4th of April, 1873.

Dr. ROBERT JOHN GARDEN, from Aberdeen, has attended during the past Session my Lectures on Auscultation and Percussion with the greatest diligence, which I willingly testify to him.

DR. FRAENTZEL,

Tutor at the University, and Medical Director  
in the *Charité* in Berlin.

*From Dr. GURLT, Professor of Surgery in the University of Berlin.*

LA CHARITÉ,  
BERLIN, 28th November, 1872.

I have much pleasure in certifying that Dr. R. J. GARDEN, from Aberdeen, attended my Class of Operative Surgery, and that he performed all the operations on the dead subject to my entire satisfaction.

DR. E. GURLT,  
Professor of Surgery in the University of Berlin.
